

Dear Sirs:

I'm pleading with you to reject NAB's petition 04-160 to limit my ability to receive XM Instant Traffic and Weather. Since the first of this year I have been using my XM radio in my vehicle daily. XM provides me with a large variety of radio stations that I can receive anywhere in the country. I pay for this service and should be able to receive Instant Traffic and Weather anytime. Why should the National Association of Broadcasters limit my ability to receive these stations. I can not always receive them on the local channels. I prefer XM radio over my CD player, excellent sound quality and an unbelievable library of music. No other radio broadcasting station can offer this!

Please allow XM radio to continue broadcasting XM Instant Traffic and Weather!

Ralph Weil
